ALPHA KIT™

The Arthur Products Co. is pleased to introduce the AquaNoz™ **ALPHA KIT™**. This kit is configured for a low flow - low pressure system. Kits are available in 1/8" FNPT and 1/4" FNPT versions and are drilled to the end user's specific pressure and flow. The **ALPHA KIT™** was designed for use by the property owner who has a low pressure system and likes to "do-it yourself". Many property owners live in areas where a professional drain cleaning service is not readily available. The **ALPHA KIT™** provides the tools necessary to dislodge solid and partial blockages along with flushing out loose debris such as grease, hard soap, ice, leaves, sand, and etc.
